

Annual Vehicle Miles of Travel on Selected Routes, Baltimore Region

Baltimore Region AVMT only represents the AVMT on selected major routes and does not represent the total AVMT of the entire region.

The AVMT for the Baltimore Region was calculated along I-70 from the Frederick/Carroll County line east and along I-95 from the Prince George's/Howard County line north to the Harford/Cecil County line.

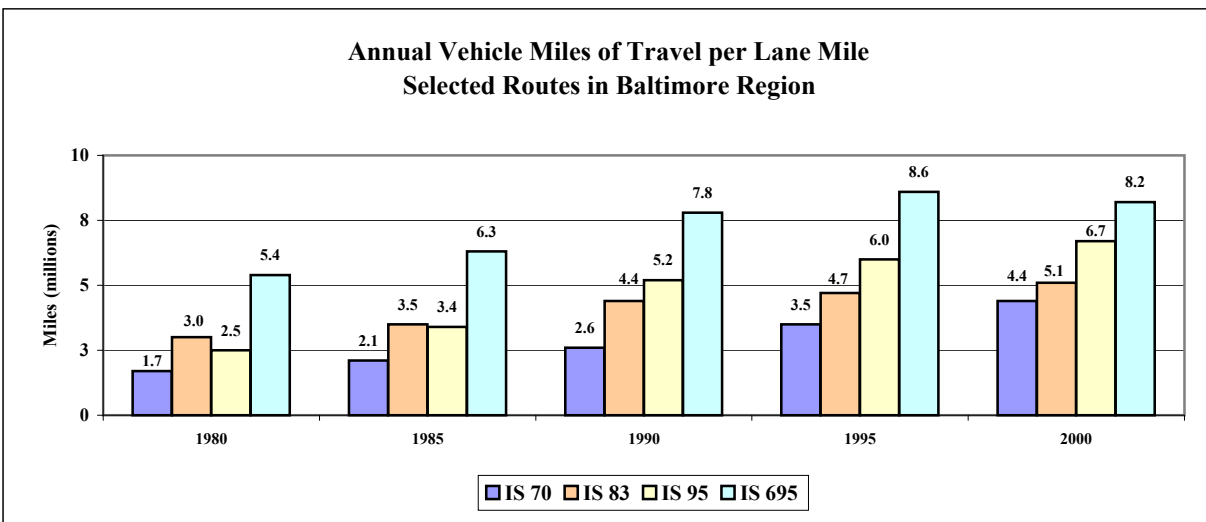

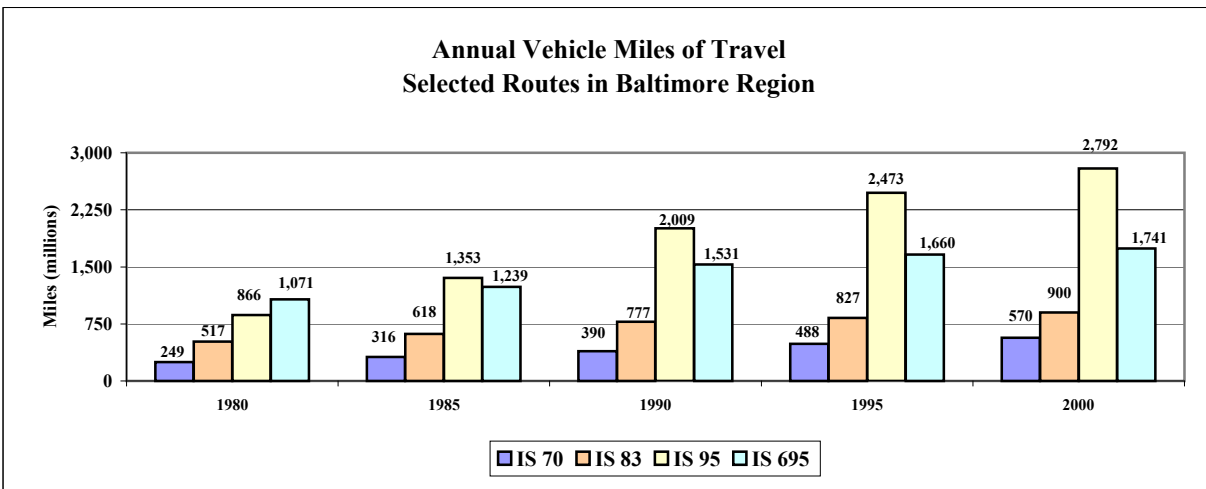

I-95 carries the greatest amount of AVMT in the region, however, I-695 carries the greatest amount of AVMT per lane mile resulting in slower speeds and increased congestion.

Since 1995, the annual rate of growth for AVMT has grown at a slower rate than in previous years.

Annual Vehicle Miles of Travel, Baltimore Region

Notes: a) IS 70 VMT calculated from the Frederick/Carroll County Line East.

b) IS 95 VMT calculated from the Prince George's/Howard County Line to the Harford/Cecil County Line
